

Enterprise Mobility + Security

Simple, secure access to all of your applications

Today's workforce is highly mobile and business is conducted from almost anywhere, at any time. For businesses to be competitive, they need their employees to be productive on-the-go while keeping company data secure.

What is Enterprise Mobility and Security?

Today, users can work anywhere with complete access to the apps—like Microsoft Office 365—and the data they need to be productive. Deliver all of this while giving IT peace of mind with tools that help secure company data. These tools also include integrated ways to manage the mobile workforce for user identity, devices, applications, and data.

The Value

- Single sign-on to all apps
- Conditional access, beyond device checks
- Monitor and protect identity
- More convenience, fewer costs with self-service options

The Proof

- Govern how personal data is used and accessed
- Establish security controls to respond to vulnerabilities
- Gain visibility and control of data in cloud apps

The Outcomes

- Provide persistent data protection on-premises and in the cloud
- Manage access to data
- Protect data in mobile devices and applications

What our clients say

"It made more sense to use Windows IoT Core for GLAS because we wanted to focus more on user experience and design while gaining the peace of mind that Windows security and updates provide. It's allowed us to shift our focus to product quality and the unique experience this device gives to customers."

— Joseph Ribbich, GLAS and Emerging Technologies

The Capax Difference

In this mobile-first, cloud-first world, it's important to step back and think holistically about the data lifecycle, to meet the personal data protection and security requirements of the GDPR.

At Capax Global, our team has an unmatched background in commercial application development which makes our modern application development, data platform modernization and advanced analytics practices enterprise class. We will be with you for your entire journey, no matter where you are starting from, using our IDEA-based approach: Innovate, Design, Execute, and Achieve.
