

Teams + Collaboration

User voice to deliver a collaborative platform

Microsoft Teams with Sharepoint provides a single platform for meetings, voice, collaboration, and file management. It will reduce costs by avoiding per-minute audio conferencing provider costs and PBX maintenance/PSTN costs. Businesses are migrating from Skype for Business to Microsoft Teams in order to rapidly expedite collaboration within an organization. Administrators will save time with one solution that is easy to setup and provide to new users. Teams drastically boosts employee and team productivity from any device, and on one platform.

What is Teams?

Teams solves the problem of fragmented communication solutions and the lack of functionality across a multitude of devices. Most communications platforms are incredibly complicated, expensive and unreliable. Teams Online provides a simple, secure, and flexible solution.

The Value

- Collaboration software to empower teams
- Modern voice and integrated file management
- Security, compliance, control, and reliability

The Proof

- One platform for meetings
- Reduce conferencing costs
- Save administrative time by using one solution

The Outcomes

- Boost productivity from anywhere on one platform
- Reduce costs for conferencing and voice

What the industry is saying

"Working together to make product and business decisions faster is the key to success for Kraft Heinz. We see PSTN Conferencing and Cloud PBX through Skype for Business as a great opportunity to help employees connect quickly wherever they are."

—Leandro Balbinot, North America CIO, Kraft Heinz

The Capax Difference

Microsoft Teams provides a rich experience across mobile, desktop, and meeting room platforms for team collaboration. It satisfies various work styles by transitioning seamlessly from messaging to voice to file sharing.

Innovation starts with finding and cultivating big IDEAS. At Capax we know how to bring your IDEAS to life - literally. Our team can help you inject some radically new tech-based capabilities into your business, no matter where you are starting from, here's how it works: Investigate, Design, Execute, Automate, and Support.
